WHAT IS BEP-20 (BSC)

BNB is an Binance Coin, is the native cryptocurrency of Binance. One of the largest cryptocurrency in the world. Initially launched in 2017 as an ERC-20 token on Ethereum Blockchain. BNB has since migrated to Binance own blockchain.

Binance chain, and now operates on Binance Smart Chain (BSC). BNB as initially created as a utility token for Binance users to pay transction fees as discounted rates, but it has since evolved to play much larger role within the Binance ecosystem and beyond.

WHAT IS SMART CONTRACT ?

A Smart Contract is a self executing digital contract with terms written in code , designed to run on blockchain platform like Ethereum. It automate contract execution without Intermediaries, ensuring transperancy, security and efficiency. Once deployed Smart Contract executes autonomously when predefined conditions are met. They find applications in finance, supply chain and more , reducing the need for manualprocesses and enhancing trust through blockchains decentralized nature. Despite advantages , challenges like code, vulnerabilities and legal consideration exist.

ADVANTAGES OF BINANCE SMART CHAIN (BSC)

Security

Security is about protecting users, their data and their funds through the use of advanced technologies and multiple security measures.

Transparency

Offering one of the most reliable and btransparency, Where user can trust the products and ecosystem through continuous checks to improve safety and quality.

Decentralization

Decentralisation is all about putting control back into the hands of many, instead of just a few. It means no single one has all the power. This helps to build trust because decisions are made by a group rather than one person or organisation.

Scalability

Scalability is all about how well something can grow without losing performance. Think of a blockchain that starts small but gets bigger as more people use it.
